Guarantee

Examsoon provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!.

Features

1. Comprehensive questions with complete details
2. Instant Downloadable in PDF form.
3. Verified Answers Researched by Industry Experts
4. Questions accompanied by exhibits
5. Drag and Drop questions as experienced in the Actual Exams.
6. These questions and answers are backed by our GUARANTEE.
7. Questions updated on regular basis.
8. Like actual certification exams our product is in multiple-choice questions (MCQs).

1. What is the syntax to publish an application called c:\gundy\TEST.EXE when the agent on a MetaFrame XP Presentation Server is not enabled for all applications? (Assume that the agent is installed in the default location.)

- A. c:\gundy\TEST.EXE /nossoshutdown
- B. c:\gundy\TEST.EXE c:\program files\citrix\metaframe password manager\wts\SSOLAUNCHER.EXE
- C. c:\program files\citrix\metaframe password manager\wts\SSOLAUNCHER.EXE?/publish c:\gundy\TEST.EXE
- D. c:\program files\citrix\metaframe password manager\wts\SSOLAUNCHER.EXE?/application c:\gundy\TEST.EXE

Answer: D

2. Environment:

MetaFrame XP Presentation Server deploys all applications including a web browser.

MetaFrame Secure Access Manager is used to access all applications including web applications and those published on the MetaFrame XP Presentation Server.

User devices are WinTerms.

All devices and computers are in an Active Directory domain.

Requirements:

Design a solution that allows users to logon one time to their WinTerm and have single sign on access to all applications.

Users gain access to MetaFrame Secure Access Manager through a published browser.

Which of the following solutions will ensure that all the requirements are met?

- A. Install MetaFrame Password Manager Agent on the MetaFrame XP Presentation Servers.
- B. Install MetaFrame Password Manager Agent on the MetaFrame Secure Access Manager Servers.
- C. Install MetaFrame Password Manager Agent on the MetaFrame XP Presentation Servers and WinTerm devices.
- D. Install MetaFrame Password Manager Agent on the MetaFrame Secure Access Manager Servers and the MetaFrame XP Presentation Servers.

Answer: A

3. A network consists of:

MetaFrame XP Presentation Server is used to deploy all applications.

MetaFrame Secure Access Manager is used to access web applications and MetaFrame XP Presentation Server published applications.

All user workstations are Windows 2000 Professional and Windows XP Professional.

All workstations are in the same Active Directory domain.

Required Results:

The administrator must design a solution that allows users to logon one time to their workstation and have single sign on to all MetaFrame Secure Access Manager web applications.

Desired Results:

SSO capability should be enabled for MetaFrame XP Presentation deployed applications as well.

Proposed Solution:

The administrator installs the MetaFrame Password Manager Agent on to the MetaFrame XP Presentation Servers and the workstations.

Which results does the proposed solution produce?

- A. The proposed solution produces both the required and desired results.
- B. The proposed solution produces the require but not the desired results.
- C. The proposed solution does not produce any of the required or desired results.
- D. The proposed solution produces the desired results but not the required results.

Answer: A

4. An administrator creates an application definition on a Windows 2000 Server and sends it to the synchronization point. Users who use the agent on Windows XP Professional systems are complaining that the agent is not working for that application. What went wrong?

- A. Users do not have administrator privileges.
- B. The agents are not synchronizing correctly.
- C. The latest service pack is not installed on the agent systems.
- D. The application definition was not created for the correct operating system.

Answer: D

5. In a pure MetaFrame XP Presentation Server deployment, which three components must be present? (Choose three.)

- A. Central credential storage
- B. Client workstation with an ICA client installed
- C. A MetaFrame XP Presentation Server with the agent installed
- D. A MetaFrame XP Presentation Server with the console installed

Answer: ABC

6. When the MetaFrame Password Manager Agent is installed on the client device and on the MetaFrame XP Presentation Server, this deployment is known as a _____. (Fill in the blank with an option from below.)

- A. pure MetaFrame XP Presentation Server deployment
- B. combined MetaFrame XP Presentation Server deployment
- C. consolidated MetaFrame XP Presentation Server deployment
- D. mixed environment MetaFrame XP Presentation Server deployment

Answer: D

7. An administrator will implement MetaFrame Password Manager to provide SSO for users who access published applications using web interface for MetaFrame XP Presentation Server. Users currently access applications through a browser using an ICA client. Remote connections are secured through the use of secure gateway for MetaFrame XP Presentation Server.

In which location should the agent be installed for this deployment scenario?

- A. On the server running the Secure Gateway service
- B. On the web interface for MetaFrame XP web server
- C. On each MetaFrame XP Presentation Server in the farm
- D. On the system with the Secure Ticketing Authority installed

Answer: C

8. Which statement is true?

- A. Credentials are validated by the Authentication service.
- B. The Authentication service unlocks user encryption keys.
- C. Users provide their credentials directly to the Authentication service.
- D. The Authentication service fails if the system Authentication service is not available.

Answer: A

9. Which configuration file is modified when users bulk-add applications?

- A. AELIST.INI
- B. FTULIST.INI
- C. APPLIST.INI
- D. ENTLIST.INI

Answer: B

10. What are the three layers of authentication? (Choose three.)

- A. Authenticator
- B. Authenticator API
- C. Authentication Event
- D. Authentication Storage
- E. Authentication Services

Answer: ABE

11. What generates the unique primary authentication key during a user's first-time use?

- A. Shell
- B. MS CAPI
- C. Crypto API
- D. Logon Manager

E. Authenticator API

Answer: C

12. What does the Mainframe Helper Object use to identify a host-based application?

A. SendKeys

B. Control IDs

C. window title

D. text and coordinates

Answer: D

13. What are the three parts of the Intelligent Agent Response? (Choose three.)

A. detecting the event

B. determining the appropriate action

C. decrypting the local credential store

D. encrypting the local credential store

E. responding with the correct credentials

Answer: ABE

14. In a MetaFrame Password Manager implementation, which subcomponent acts as an interface between Microsoft Windows and the Agent?

A. MS CAPI

B. FTULIST.INI

C. Logon Manager

D. Authenticator API

Answer: D

15. Which algorithm is used by MetaFrame Password Manager to encrypt and decrypt user credentials?

A. AES

B. RC-4

C. RC-5

D. Triple-DES

Answer: D

Examsoon.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially [Adobe](#), [Apple](#), [Citrix](#), [Comptia](#), [EMC](#), [HP](#), [Juniper](#), [LPI](#), [Nortel](#), [Oracle](#), [SUN](#), [Vmware](#) and so on. And help you pass any IT Certification exams at the first try.

we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!
