Guarantee

Examsoon provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!.

Features

1. Comprehensive questions with complete details
2. Instant Downloadable in PDF form.
3. Verified Answers Researched by Industry Experts
4. Questions accompanied by exhibits
5. Drag and Drop questions as experienced in the Actual Exams.
6. These questions and answers are backed by our GUARANTEE.
7. Questions updated on regular basis.
8. Like actual certification exams our product is in multiple-choice questions (MCQs).

1. Which Action can be used to create Level zero blocks within Hyperion Business Rules (HBR)?

- A. Aggregate Data
- B. Copy Formula
- C. Copy Data
- D. Clear Data

Answer: C

2. Metadata security has been set to be exactly the same for all users. If a Web form has been created enabling users to dynamically add rows, which two statements are valid? (Choose two.)

- A. Users will see the initial rows and all rows added by all users the next time they open the Web form.
- B. Users with Read Access to the Web form can dynamically add rows to the Web form.
- C. Users need Write Access to the Web form to dynamically add rows to the Web form.
- D. Users will see the initial rows and only the rows they added to the Web form the next time they open the Web form.

Answer: AB

3. Which Hyperion Application Link Adapter can be used for loading data values?

- A. Hyperion Business Rules Adapter
- B. Hyperion Planning Adapter
- C. Hyperion SmartView for Office Adapter
- D. Hyperion Analytic Services Adapter

Answer: D

4. What two changes to the application would require the HspCRtB.csc script be re-run? (Choose two.)

- A. Changed the Exchange Rate Type for an account from Average to Ending
- B. Changed the Data Type for a Saved Assumption account from Percentage to Currency
- C. Changed the Data Storage on East Region entity from Dynamic Calc to Store
- D. Changed the Account Type from Revenue to Expense

Answer: AB

5. Which two statements are true about assigning members to plan types? (Choose two.)

- A. If User-defined custom dimension has been assigned to a plan type in the application, you cannot assign which members are valid in that plan type.
- B. If the plan type is not assigned to a member, that member's children will not have access to that plan type or its aggregation options.
- C. If you have more than one plan type in an application, you cannot assign more than one plan type to an individual dimension member.
- D. If you use a User-defined custom dimension, you can specify the source plan type for the members.

Answer: AB

6. What action creates the HSP_Rates dimension?
- A. Creating a new Exchange Rate table and refreshing the application
 - B. Setting up an application that supports multiple currencies
 - C. Creating a new currency and refreshing the application
 - D. Running a Currency Conversion CalcScript during a refresh

Answer: B

7. Which three predefined types of base time periods can be established when creating the calendar?
(Choose three.)

- A. Weekly
- B. Monthly
- C. Quarterly
- D. Yearly
- E. Custom

Answer: BCE

8. When should you use multiple plan types?
- A. When detailed revenue information must be separate from high-level P and L summary accounts
 - B. When multiple currencies must be kept in a separate database
 - C. When exchange rates must be kept in a separate database
 - D. When data cannot be shared across an organization

Answer: A

9. Which two statements are true? (Choose two.)
- A. You can assign only aggregation options to User-defined custom dimension members.
 - B. You can assign plan types and aggregation options to User-defined custom dimension members.
 - C. You can assign only aggregation options to Entity dimension members.
 - D. You can assign plan types and aggregation options to Entity dimension members.

Answer: AD

10. When defining the base time period and weekly distribution methods, which statement is true?
- A. If you select a Weekly distribution method, Hyperion Planning sets every account member to that distribution method.
 - B. The weekly distribution pattern options are available only if you select the base time period option 12 Months.
 - C. If you select the 4-4-5 pattern, Hyperion Planning treats the first month in a quarter as if it has four weeks, and the last two months in the quarter as if they have five weeks.
 - D. Hyperion Planning allows you to set up weekly distribution patterns, which determine how values are spread when the base time period is monthly.

E. Hyperion Planning automatically distributes the value over the base time periods that make up the summary time period.

Answer: E

11. Which element can be changed after the Hyperion Planning application has been created?

- A. weekly distribution spread
- B. default currency
- C. number of years
- D. number of plan types
- E. starting fiscal year and month

Answer: C

12. During the initial application setup, two plan types were created. The administrator now wants to add a third plan type. How can this be accomplished?

- A. After the application has been created, the number of plan types cannot be changed via the Planning Desktop.
- B. Go to Manage Database and create a new plan type.
- C. Go into Analytic Administration Services and create a new database for this application.
- D. Walk through Setup Application again for the same application.

Answer: A

13. Plan Type 1 is specified as the source plan type for a member. This member is selected on a form associated with Plan Type 2. Which statement is true?

- A. Assuming write access to the member, the user can enter data to the member on the form.
- B. Assuming the planning unit is promoted to the user, the user can enter data to the member on the form.
- C. The member is not displayed on the form.
- D. The user will see the member displayed as read-only on the form.

Answer: D

14. If you choose the Use Calculator Cache option in the Aggregate Data component, what two statements are true? (Choose two.)

- A. It only improves calculation performance on two pass calculations.
- B. It can significantly improve calculation performance.
- C. In the Analytic Services setting, the CALCCACHE setting must be selected.
- D. The CALCCACHE setting must be included in the Essbase.cfg file.

Answer: BD

15. The administrator needs to execute several calculations sequentially against two different databases. Which three execution options are appropriate? (Choose three.)

- A. Batch file

- B. Esscmd
- C. Business Rule Sequence
- D. Calc script

Answer: ABC

16. What are three ways to enhance calculations within Hyperion Planning beyond Hyperion Business Rules (HBR)? (Choose three.)

- A. Create a member formula within the Analytic Administration Services
- B. Create a formula in the Essbase Spreadsheet Add-in and Lock and Send
- C. Create an Essbase calc script via the Analytic Administration Services
- D. Convert the business rules to an enhanced calc script

Answer: ACD

17. What option contributes to making an Enhanced Calc Script more flexible over a native Calc Script?

- A. Run on save
- B. @CALCMODE function
- C. Run-time prompts
- D. Can be run from the Planning web

Answer: C

18. A Hyperion Business Rule (HBR) is being created to calculate benefit expense by Entity based on total salaries, which have been calculated for individual employees. Total Entity benefits need to be displayed when the calculation is complete. What is the correct sequence order of the components within HBR?

- A. custom calculation, aggregate benefits, aggregate salaries
- B. aggregate benefits, aggregate salaries, custom calculations
- C. custom calculations, aggregate salaries, aggregate benefits
- D. aggregate salaries, custom calculation, aggregate benefits

Answer: D

19. Which three statements are true about using the formula Variable component in Hyperion Business Rules (HBR)? (Choose three.)

- A. Can apply to multiple business rules
- B. Can be derived from a calculation
- C. Multiple variables can be used within a single business rule
- D. Represents a single numeric value

Answer: BCD

20. What must be done prior to using the Create Blocks action in a Hyperion Business Rule (HBR)?

- A. Analytic Services database settings Create Blocks on Equation must be selected.
- B. Analytic Services configuration file (essbase.cfg) must have the Create Blocks option turned on.

- C. Data must be loaded to the blocks prior to running the Hyperion Business Rule.
- D. Analytic Services Information must be validated for the potential number of blocks.

Answer: A

Examsoon.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially [Adobe](#), [Apple](#), [Citrix](#), [Comptia](#), [EMC](#), [HP](#), [Juniper](#), [LPI](#), [Nortel](#), [Oracle](#), [SUN](#), [Vmware](#) and so on. And help you pass any IT Certification exams at the first try.

we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!
