Exam : Microsoft 70-219

Title : DESIGNING A WIN2K DIRECTORY SERVICES INFRASTRUCTURE

1. The picture is the question

The picture is the answer.

9. You need to recommend a solution to meet the corporate security office's technical requirements for domain controller traffic. What should you do?

- A. Configure an IPSec policy for all domain controller IP addresses
- B. Publish a certificate to each domain controller and configure SSL
- C. Configure SMTP replication between domain controllers and use the secure S/MIME protocol
- D. Deploy VPN servers at each site and configure router-to-router VPN tunnels

Answer: A

2. QUESTION:

Answer:

3. What are the technical ramifications of the company's forest design decision? (Choose all that apply)

- A. Authentication between the military and aerospace division will no longer be provided by Kerberos
- B. There will be no native global catalog of objects between the military and aerospace divisions
- C. The military and aerospace divisions will not be able to share resources
- D. A user will not be able to log on to that user's client computer by using an e-mail style user principal name (UPN)
- E. There will be no automatic transitive trusts between the military and aerospace divisions

Answer: ABE

4. You need to create a security model for the organizational unit that will contain the Sydney resource. You want to support the technical requirements of the CIO. Which right or rights should you grant to the Sydney IT staff? (Choose all that apply)

- A. Create and manage computer objects
- B. Create and manage user objects
- C. Create organizational unit objects
- D. Create and manage domain local group objects
- E. Create and manage their own GPOs

Answer: ADE

5. Which technical factor or factors influenced the company's forest design decision? (Choose all that apply)

- A. Network Address Translation (NAT) devices are separating domain controllers
- B. None: the decision was not influenced by technical factors

- C. Bandwidth is not sufficient to support a single forest
- D. Firewalls are separating the domain controllers
- E. The company wants to eliminate trusts between domains
- F. DNS service cannot resolve name throughout the forest

Answer: B

6. Which business or technical factor has the most influence on the number of internal forests that you include in your design?

- A. Lack of physical security of domain controllers
- B. Separation of IT management between east and west
- C. General lack of trust of the central IT group
- D. Reduction of administrative overhead
- E. Possibility that the e-commerce division might be sold
- F. Domain trust requirements between the internal e-commerce domain and the external ecommerce domain

Answer: E

7. You need to analyze the data access patterns for the engineering department and make recommendations. You want to meet the CIO's technical requirements for providing access to the engineering documents. Which action or actions should you perform? (Choose all that apply)

- A. Configure replicas to replicate automatically
- B. Configure Group Policy for engineers to map to the \CorpEngDocs share
- C. Configure replicas to replicate manually
- D. Configure Group Policy for engineers to map to the \LocalServerEngDocs share
- E. Configure Group Policy for engineers to map to the \DomainNameEngDocs share
- F. Deploy DFS replicas to each site

Answer: AF

8. You need to create a trust design for Contoso, Ltd. Which trust relationship or relationships should you create?

- A. Two-way transitive trust between the military division forest root domain and the aerospace division child domain
- B. Two-way transitive trust between the military division child domain and the aerospace division child domain
- C. One-way trust where the military division forest root domain trusts the aerospace division child domain
- D. One-way trust where the military division child domain trusts the aerospace division child domain
- E. One-way trust where the military division child domain trusts the aerospace division root domain
- F. One-way trust where the military division forest root domain trusts the military division child domain
- G. One-way trust where the military division child domain trusts the military division child domain

Answer: DE

9. You need to create a domain name structure for Contoso, Ltd. Which domain names should you use? (Each correct Answer: presents part of the solution. Choose two)

- A. mil.contoso.com
military.mil.contoso.com
- B. adm.contoso.com
military.adm.contoso.com
- C. adm.contoso.com
military.adm.contoso.com

email.adm.contoso.com

D. aerospace.local

corp.aerospace.local

E. mil.contoso.com

military.mil.contoso.com

email.mil.contoso.com

F. aero.contoso.com

aerospace.aero.contoso.com

G. military.local

corp.military.local

Answer: AF

10. Which business or technical factor has the most influence on the number of internal domains that you include in your design?

A. Separation of IT management between east and west

B. Need for the creation of an empty forest root domain

C. Possibility that the e-commerce division might be sold

D. General lack of trust of the central IT group

E. Lack of physical security of domain controllers

Answer: A

11. The picture is the question

The picture is the answer.

11. Which type of IT management should be used for contoso. ltd?

A. Outsourced IT management and Outsourced administration.

B. Centralized IT management and Centralized administration.

C. De-centralized IT management and De-centralized administration.

D. Centralized IT management and De-centralized administration.

Answer: D

12. The picture is the question

The picture is the answer.

8. The picture is the question

The picture is the answer.

9. You need to recommend a solution to meet the corporate security office's technical requirements for domain controller traffic. What should you do?

A. Configure an IPSec policy for all domain controller IP addresses

B. Publish a certificate to each domain controller and configure SSL

C. Configure SMTP replication between domain controllers and use the secure S/MIME protocol

D. Deploy VPN servers at each site and configure router-to-router VPN tunnels

Answer: A

13. QUESTION:

Answer:

14. Which factor or factors in the company's forest design decision will increase the administrative overhead of managing its enterprise NOS environment? (Choose all that apply)

A. Providing a single enterprise directory

B. Duplication in planning teams for directory deployment

C. Directory management duplication

D. Complexity relating to the separation of users and resources in different forests

E. Initiation of separate design processes

Answer: CD

15. What are the two most important business considerations for the company's forest design decision? (Each correct Answer: part of the solution. Choose two)

- A. The possibility that domain controller will be located in unsafe physical locations
- B. Security concerns between divisions
- C. The hosting of Exchange 2000 by the military division
- D. Accountability for quality of service
- E. The lack of central IT authority

Answer: DE

16. You need to create a site design for Litware, Inc. How many sites should you create to support the intranet in the New York campus buildings?

- A. One
- B. Two
- C. Three
- D. Four

Answer: B

17. Which type of IT management should be used for contoso. ltd?

- A. Outsourced IT management and Outsourced administration.
- B. Centralized IT management and Centralized administration.
- C. De-centralized IT management and De-centralized administration.
- D. Centralized IT management and De-centralized administration.

Answer: D

18. You need to create an Organizational unit design for the military division Contoso, Ltd. Design options are shown in the exhibit.

Which design should you use?

- A. Design A
- B. Design B
- C. Design C
- D. Design D

Answer: A

19. According to the CIO's technical requirements, which IT group should create and maintain global groups?

- A. east and west IT managers
- B. site administrators
- C. east and west help desks
- D. global administrators team

Answer: D

20. You need to recommend a solution to meet the corporate security office's technical requirements for domain controller traffic. What should you do?

- A. Configure an IPSec policy for all domain controller IP addresses
- B. Publish a certificate to each domain controller and configure SSL
- C. Configure SMTP replication between domain controllers and use the secure S/MIME protocol
- D. Deploy VPN servers at each site and configure router-to-router VPN tunnels

Answer: A
