Exam : Microsoft 70-297

Title : Designing MS Win Server 2003 Active Dir & Netwk Infrastruc

1. You are designing the Active Directory infrastructure to meet the business and technical requirements. You run ADSizer, and find that it provides a solution that contains only one domain controller for Amsterdam. What should you do?

- A. Place at least two domain controllers in Amsterdam.
- B. Distribute the users among sites in ADSizer and recalculate the number of domain controllers.
- C. Configure the domain controller as a global catalog server.
- D. Configure the domain controller as a bridgehead server.

Answer: A

2. You are designing a DHCP solution to meet the business and technical requirements. What should you do?

- A. Force client computers to obtain an IP address from Automatic Private IP Addressing (APIPA).
- B. Increase the default lease time on all DHCP servers.
- C. Configure duplicate scopes on at least two DHCP servers.
- D. Split all address ranges across multiple DHCP servers.

Answer: D

3. You are designing a strategy to provide Internet access to all users. What should you do?

- A. Configure one server as a Routing and Remote Access VPN server.
- B. Configure Internet Connection Sharing on all client computers.
- C. Configure one server as a Routing and Remote Access NAT router.
- D. Configure Automatic Private IP Addressing (APIPA) on all client computers.

Answer: C

4. You are designing a strategy to optimize the DNS name resolution for the satellite offices that connect to the branch offices by using ISDN lines. What should you do?

- A. Place a DNS server with secondary zones of all domains at these satellite offices.
- B. Configure a Hosts file for all client computers at these satellite offices.
- C. Configure a DNS server to use WINS forward lookup at these satellite offices.
- D. Use caching-only DNS servers at these satellite offices.

Answer: D

5. You are designing the IP addressing scheme for the new Barcelona office. Which network address or addresses are valid for your design? (Choose all that apply.)

- A. 192.168.11.0/25
- B. 151.10.10.0/24
- C. 10.10.255.0/24
- D. 131.15.0.0/24
- E. 10.10.10.0/28

Answer: ECA

6. You are designing a DNS and DHCP implementation strategy to support the new environment. What should you do?

- A. Create a WINS resource record in the Active Directory DNS zone.
- B. Create a WINS referral zone in the DNS zone that supports Active Directory.
- C. Configure a DNS domain name on the DHCP server.
- D. Configure the DHCP server to update DNS for DHCP clients that do not support dynamic updates.

Answer: D

7. You are designing a DNS strategy to meet the business and technical requirements. What should you do?

- A. Install the DNS Server service on all domain controllers. Create Active Directory-integrated zones. Replicate the zones to all DNS servers in the forest.
- B. Install the DNS Server service on all domain controllers. Create Active Directory-integrated zones. Replicate the zones to all DNS servers in the domain.
- C. Install the DNS Server service on all domain controllers. Create primary zones and secondary zones.
- D. Create application partitions for the different zones on one domain controller. Configure replication to occur on all DNS servers.

Answer: B

8. You are designing the placement of the global catalog servers. You want to use the minimum number of global catalog servers that are required. Which design should you use?

- A. one global catalog server in New York
- B. two global catalog servers in New York
- C. one global catalog server in Chicago and one global catalog server in New York
- D. two global catalog servers in Chicago and two global catalog servers in New York
- E. one global catalog server in Chicago, one global catalog server in New York, and one global catalog server in Boston

Answer: E

9. You need to identify the number of servers that will be used specifically for operations master roles. How many servers should you recommend?

- A. 11
- B. 5
- C. 17
- D. 14
- E. 20

Answer: A

10. You are designing the placement of operations master roles in the new environment. In which location or locations should a PDC emulator be designated? (Choose all that apply.)

- A. Atlanta
- B. Chicago
- C. Dallas
- D. Seattle

Answer: A
