- A. Scheduled conference
- B. Administrator conference
- C. Meet Me conference
- D. Instant conference

Answer: A

6. Click the Exhibit button.

In the exhibit, which diagnostic heading can be used to obtain Software Communication System 500 (SCS500) and Apache Web server diagnostic information and logs?

- A. Job Status

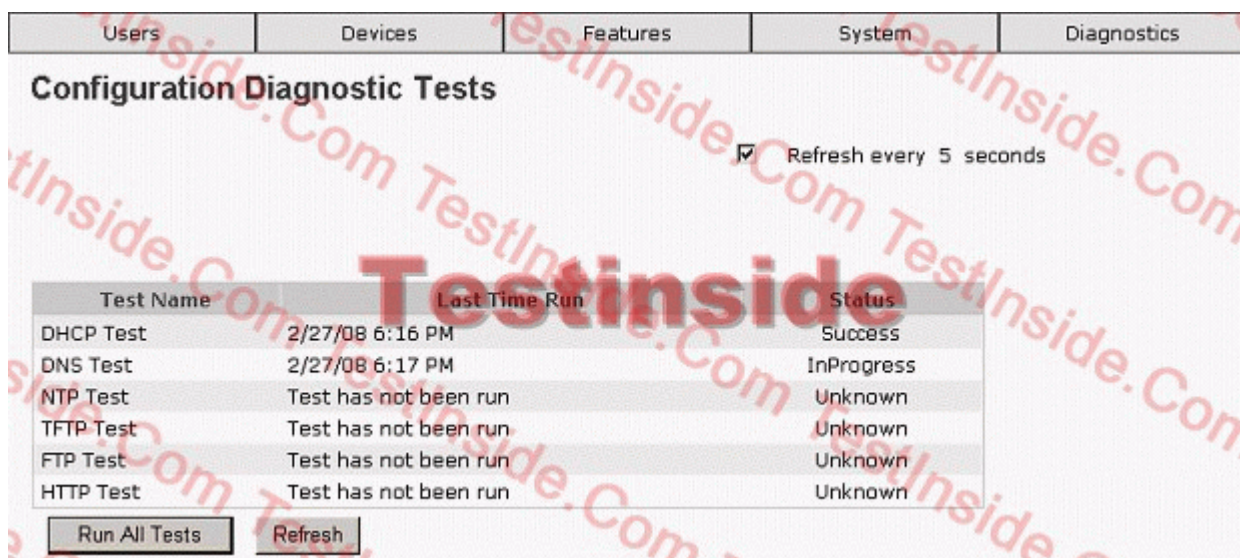

B. Configuration Tests

C. Services

D. Snapshot

Answer: D

7. Click the Exhibit button.

The screenshot shows a web interface for Configuration Diagnostic Tests. At the top, there are navigation tabs: Users, Devices, Features, System, and Diagnostics. Below the tabs is the title "Configuration Diagnostic Tests" and a checkbox labeled "Refresh every 5 seconds" which is checked. A table displays the results of various tests:

Test Name	Last Time Run	Status
DHCP Test	2/27/08 6:16 PM	Success
DNS Test	2/27/08 6:17 PM	InProgress
NTP Test	Test has not been run	Unknown
TFTP Test	Test has not been run	Unknown
FTP Test	Test has not been run	Unknown
HTTP Test	Test has not been run	Unknown

At the bottom of the table, there are two buttons: "Run All Tests" and "Refresh".

In the Configuration Diagnostic test, what does Success in the Status column indicate regarding the DHCP test?

A. DHCP is enabled on the Software Communication System 500 (SCS500).

B. A DHCP service is available and is issuing IP addresses.

C. All gateways are configured for DHCP.

D. All phones connected to the SCS500 are able to receive IP addresses.

Answer: B

8. To avoid data loss, what must a successful backup management policy for the Software Communication Server 500 (SCS500) include?

A. regularly scheduled backups of voicemail files

B. a dedicated area created on the server hard disk

C. unlimited storage to prevent older records from being overwritten

D. a backup file storage location separate from the Software Communication System 500 (SCS500) server

Answer: D

9. When you create a scheduled backup, where is the backup archive stored?

- A. on the management PC
- B. on the network device designated during configuration of the backup
- C. in a protected area of system memory
- D. locally on the Software Communication System 500 (SCS500)

Answer: D

10. Which action is required to configure Hunt Group call scenarios for incoming received digits presented to the Software Communication System 500 (SCS500) system?

- A. Configure user aliases.
- B. Enter the digits from the provider of the digital trunk as the hunt group number.
- C. Determine the call sequence for Hunt Group user extensions.
- D. Specify a Hunt Group Fallback Destination.

Answer: B
