5. Drag and Drop questions as experienced in the Actual Exams.
6. These questions and answers are backed by our GUARANTEE.
7. Questions updated on regular basis.
8. Like actual certification exams our product is in multiple-choice questions (MCQs).

1. A customer has a Multimedia Communication Server (MCS) 5100 RIs. 4.0 system installed in a four-server configuration. They want to provide database backups for their Database Manager.

What is the recommended method for backing-up the database?

- A. backup to tape
- B. backup to client PC
- C. backup over the IP network
- D. backup to CD on the server CD-RW (Read-Write) drive

Answer: C

2. A customer plans to implement a Multimedia Communication Server (MCS) 5100 RIs. 4.0 system and wants to ensure that the site has the necessary equipment to interconnect to their existing IP-based enterprise network.

Which requirement must be provided before the system can be installed and connected to the enterprise network?

- A. two separate AC power sources
- B. optional Uninterruptible Power Supplies
- C. layer 1 switch with 1G Ethernet interfaces
- D. layer 2 switch with 10/100M Ethernet interfaces

Answer: D

3. A service provider wants to use a console connection to configure a four-server Multimedia Communication Server (MCS) 5100 RIs. 4.0 system from a common platform.

What hardware is required?

- A. a Layer 2 switch
- B. a Layer 3 switch
- C. a Terminal Server
- D. a System Management Console PC

Answer: D

4. A customer has deployed a Multimedia Communication Server (MCS) 5100 RIs. 4.0 system with two Database Managers to provide redundancy.

Which statement describes how redundancy is implemented for the Database Managers?

- A. The secondary Database Manager will take over if the primary does not respond to a periodic ping message.
- B. If a problem occurs with the primary Database Manager, the secondary Database Manager takes over in read-only mode.
- C. Both Database Managers are active; there is neither a primary nor a secondary Database Manager. Either Database Manager can process all data.

D. The System Manager will force a transfer to the secondary Database Manager, if the primary does not respond to a periodic ping message.

Answer: B

5. In a Multimedia Communication Server (MCS) 5100 RIs. 4.0 four-server or eight-server configuration, which two roles does the Session Manager perform? (Choose two.)

- A. It serves as a SIP Proxy Server.
- B. It collects billing data for all SIP clients.
- C. It processes SIP requests and responses.
- D. It translates Unistim transactions to the SIP.

Answer: AC
