Guarantee

Examsoon provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!.

Features

1. Comprehensive questions with complete details
2. Instant Downloadable in PDF form.
3. Verified Answers Researched by Industry Experts
4. Questions accompanied by exhibits
5. Drag and Drop questions as experienced in the Actual Exams.
6. These questions and answers are backed by our GUARANTEE.
7. Questions updated on regular basis.
8. Like actual certification exams our product is in multiple-choice questions (MCQs).

1. What is a major flaw of the Waterfall approach to system development?

- A. There is no Analyze phase; the steps go from Plan directly to Design.
- B. Steps are followed sequentially without returning to previous steps.
- C. Technical constraints tend to overrule user requirements.
- D. This approach can only be implemented using large teams.

Answer: B

2. What issue is Iterative Development specifically designed to address?

- A. No developed solution will satisfy all users equally.
- B. Users often feel that IT does not understand the business.
- C. The very act of developing a system or solution could change the business requirements.
- D. Users understand their business processes but they do not usually understand application development.

Answer: C

3. When developing a Cognos Planning system, when is prototyping most useful?

- A. When the user requirements are unclear.
- B. When the development team is very large.
- C. When the client can afford the extra time and cost required.
- D. When the solution is being implemented for a department other than Finance.

Answer: A

4. Which of the following is a best practice when designing to limit complexity in an Analyst model?

- A. Design different D-Cubes for different purposes.
- B. Use only simple calculations in the D-Lists.
- C. Have one or two very large D-Cubes in the model.
- D. Use D-Cubes with only short D-Lists.

Answer: A

5. When designing a model, which groups of people should be given greatest consideration?

- A. Those entering or reviewing data.

- B. Those administering the model.
- C. Those developing and supporting the model.
- D. Those importing the data from external sources.

Answer: A

6. How could the following D-Cube be improved so that it is easier for end users to understand what they need to input?

Industrial Metalworking		East				
		Jan				
	Jan	Feb	Mar	Apr	May	Jun
Forecast Method	Act / Bud	Act / Bud	Act / Bud	Act / Bud	Act / Bud	Act / Bud
Act/Fcst Flag	Actual	Actual	Actual	Forecast	Forecast	Forecast
Periodic Flag						
No of Periods	2	2	2	2	2	2
DAYS IN PERIOD	30	30	30	30	30	30
Budget	100	100	100	100	100	100
Actual	93	300	98			
Override	68	105	125	94	108	120
FORECAST	93	300	98	100	100	100

- A. Remove the calculation D-List from the D-Cube.
- B. Rename D-List items to use more familiar wording.
- C. Rename the calculation D-List to reflect the calculations being performed.
- D. Replace the Built in Function on the calculation D-List with simple calculations.

Answer: B

7. A company wants to use Contributor to plan several business processes. Salary planning is done every six months, revenue and expense planning is done on a rolling monthly basis, and capital expenditure is done annually.

To aid the planning process, which suggestion is considered best practice for this company?

- A. One application to cover all of the business processes with D-Links to transfer data between D-Cubes.
- B. An application for each business process with flat files to transfer data between them.
- C. An application for each business process with system links and D-Links to transfer data between them.

D. An application for each business process with system links and administration links to transfer data between them.

Answer: D

8. Which of the following is a best practice when designing an Analyst model for ease of maintenance?

- A. Use local allocations in D-Links when D-List items do not match.
- B. Ensure the D-List items are all less than 30 characters in length.
- C. Set up import links and use in the automation of the update of D-Lists.
- D. Design many smaller D-Cubes instead of few large ones.

Answer: C

9. If a customer is planning to create many Contributor Applications, which objects should be stored in the common library?

- A. Saved Formats, Assumption D-Cubes, all D-Lists
- B. All D-Cubes, e.List, D-Links
- C. Saved A-Tables, shared D-Lists, Reports
- D. e.List, Saved Formats, Reports

Answer: C

10. Two D-Lists must be allocated in a D-Link. The allocation changes regularly, is maintained by the administrator, and should be available for several different Contributor applications. What is the most appropriate allocation type to use?

- A. Local allocation within the D-Link.
- B. A-Table saved to the common library.
- C. A-Table saved to the contributor application library.
- D. D-Cube allocation saved to the common library.

Answer: B

Examsoon.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially [Adobe](#), [Apple](#), [Citrix](#), [Comptia](#), [EMC](#), [HP](#), [Juniper](#), [LPI](#), [Nortel](#), [Oracle](#), [SUN](#), [Vmware](#) and so on. And help you pass any IT Certification exams at the first try.

we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!
