Guarantee

Examsoon provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!.

Features

1. Comprehensive questions with complete details
2. Instant Downloadable in PDF form.
3. Verified Answers Researched by Industry Experts
4. Questions accompanied by exhibits
5. Drag and Drop questions as experienced in the Actual Exams.
6. These questions and answers are backed by our GUARANTEE.
7. Questions updated on regular basis.
8. Like actual certification exams our product is in multiple-choice questions (MCQs).

1. Click the Exhibit button.

A customer requests a replacement of B-series switches with M-series switches in the configuration shown in the exhibit. Why is it NOT possible to fulfill the customer's request as a supported solution?

- A. Only Brocade supports a ring topology.
- B. The maximum number of switch hops is three.
- C. A minimum of two inter-switch links is required.
- D. Ring topology requires an uneven number of switches.

Answer: B

2. After gathering all customer requirements, you offer a solution. There are different validation levels available to ensure the solution meets or exceeds the customer's needs. Which method is NOT adequate?

- A. Setup a test environment which addresses most key aspects.
- B. Compare the solution against the rules of the SAN Design Guide.
- C. Compare the solution against the rules of the OEM manufacturer.
- D. Choose a supported standard solution of the SAN Design Guide.

Answer: C

3. What is the most important consideration if a service level requirement is high availability?

- A. capability to scale incrementally over time as storage and connectivity needs increase
- B. decision to implement a dual redundant SAN
- C. implementation of serverless backup
- D. decision to use iSCSI instead of Fibre Channel

Answer: B

4. A customer with HP-UX and Linux servers and EVA storage subsystems wants to integrate all components into one disaster tolerant configuration. What is the best product?

- A. Business Copy
- B. Continuous Access
- C. Secure Path Manager
- D. High Availability Fabric Manager

Answer: B

5. In addition to the SAN Design Reference Guide and the Enterprise Backup Solution Design Guide, what do you need to validate a SAN design with an integrated Enterprise Backup Solution (EBS)? Select TWO.

- A. SAN Compatibility Matrix
- B. EBS Compatibility Matrix
- C. SAN and EBS Sizer Tool
- D. Backup Sizing Tool
- E. SAN Storage Planner

Answer: BD

6. Which tools CANNOT be used for data management in a SAN? Select TWO.

- A. Virtual Replicator
- B. Fabric Watch
- C. Business Copy
- D. Continuous Access EVA
- E. Storage Node Manager

Answer: BE

7. A customer has a SAN environment with EVA storage systems, multiple hosts, and no SAN security application. The primary association table that enables a host-to-LUN connection is located on the _____.

- A. EVA subsystem
- B. SAN switches
- C. SAN management server
- D. associated hosts

Answer: A

8. What is an aspect of physical SAN security?

- A. centralized SAN management
- B. no-single-point-of-failure SAN design
- C. employment of at least two SAN managers
- D. restricted direct access to SAN devices

Answer: D

9. Which license is required for fabric wide resource utilization analysis on B-series switches?

- A. OpenView Storage Builder
- B. Fabric Resource Analyzer
- C. Selective Storage Presentation
- D. Advance Performance Monitor

Answer: D

10. Why should event logging be enabled on all devices connected to a SAN?

- A. Distributed event logging keeps the device event logs small and prevents buffer overflow.
- B. Enabling event logging replicates the event log to other devices for information redundancy.
- C. Event filtering will not work correctly if event logging is not enabled.
- D. Certain events such as "signal loss" are detected only in the locality of the problem.

Answer: D

11. A working connection from a host to SAN storage is defined by the HBA WWN, storage port WWN and _____.

- A. switch port number, LUN
- B. operating system
- C. operating system, LUN
- D. operating system, connection alias

Answer: C

12. Which statement is correct?

- A. Dual fabrics provide enhanced SAN security.
- B. Zoning is an implementation of access control.
- C. Cascaded switches provide optimum performance.
- D. Inter-switch link trunking is an implementation of static routing.

Answer: B

13. What happens if switch binding is enabled on a SAN switch?

- A. Inter-switch link trunking is disabled.
- B. New GBICs on the switch must be registered to become operable.
- C. Devices cannot be moved to a different port.
- D. New devices must be registered to become operable.

Answer: D

14. Which information should be provided to the storage controllers so that a server can properly utilize the assigned SAN storage?

- A. operating system type
- B. server platform code
- C. controller password
- D. file system type

Answer: A

15. What can you do when you launch Embedded Web Server (SANpilot)?

- A. Communicate with SAN users.
- B. Create RAIDsets and LUNs.
- C. Configure an M-series switch.
- D. Control paths to remote hosts.

Answer: C

Examsoon.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially [Adobe](#), [Apple](#), [Citrix](#), [Comptia](#), [EMC](#), [HP](#), [Juniper](#), [LPI](#), [Nortel](#), [Oracle](#), [SUN](#), [Vmware](#) and so on. And help you pass any IT Certification exams at the first try.

we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!
