1. John-Michael needs to preview a newly created piece of news content. The news content is linked to multiple Site Areas. When John-Michael previews the content, which one of the Site Areas will be used?

- A. The primary Site Area.
- B. The first Site Area in the Site Framework.
- C. A selection screen will open allowing him to choose a Site Area.
- D. A selection screen will open allowing him to choose a Presentation Template. This selection implies the appropriate Site Area.

Answer: C

2. Shane is the administrator of a Workplace Web Content Management server. Devin is a developer working on a new site for the Marketing department. Sarah is the Marketing Manager responsible for the content of the Marketing site. During the design meetings for the new site it is decided that the Marketing content should be placed in its own (new) Library. Which of the above people would

have the security rights necessary to create a new Library?

- A. Shane only an administrator has the rights to create a Library.
- B. Shane and Devin only developers and administrators can create Libraries.
- C. Shane, Devin, or Sarah anyone who can access the WCM Authoring Environment can create a new Library.
- D. None of the above someone has to be granted the Library_Administrator role in order to create a Web Content Management Library.

Answer: A

3. Click on the Exhibit button.

The six content items listed in the exhibit were created using the taxonomy and site framework listed in the exhibit.

Belinda would like to use WCM Taxonomy components with WCM menus to allow end users to filter content items with the site.

Belinda creates a form and when testing her form, she appends the following Query String to the URL so that the end URL appears to the end user as:

http://host/wps/wcm/connect/site/home/NorthAmerica?Year=07Template=Publications

Which of the following settings would the menu component need to be set to use the above parameters?

Taxonomy	Site Framework
All Categories	Internet
Years	Asia Pacific
07	North America

Include categories from the following sources:

User-specified rendering portlet configuration

Current content

Restrict to:

[/web_content/All_Categories/Years](#)

Design for each menu search result:

<Placeholder tag="Namelink"/>

- A. Sydney Lotus News Item 07
- Hong Kong Lotus News Item 07
- B. New York WebSphere News 06
- Sydney Lotus Publications 06
- C. Hong Kong Publications 07
- New York WebSphere News 06
- Sydney Lotus Publications 06

D. Sydney Lotus News Item 07

Hong Kong Lotus News Item 07

New York, Product Publications 07

Answer: B

5. Neil works for an entertainment company. Occasionally specials are released for select performances. Within WCM he has created a Performance Authoring Template, and one field within the Authoring Template, is called Specials. All Content Authors should be able to update / create Performance content items, but only a subset of Content Authors, Expert Content Authors are able to edit and read the Specials field. How can Neil ensure that only Expert Content Authors are able to edit and read the discounts field within the authoring template?

A. Within the field properties of the Specials field, Content Authors should be placed within Viewers and Editors field.

B. Within the field properties of the Specials field, Expert Content Authors should be placed within Viewers and Editors field

C. Within the field properties of the Specials field, Content Authors should be placed within Viewers field

D. Within the field properties of the Specials field, Expert Content Authors should be placed within Viewers field

Answer: B

6. The legal department uses the Authoring Template Legal Attachment to upload PDF documents. They upload this file into a File Resource Field called Ruling. These documents should not exceed 2MB.

The marketing department uses the Authoring Template, Marketing Content to upload flash files. They upload this file into a File Resource Field called Flash. These files should not exceed 5MB.

David is the WCM Administrator of the two sites, how can he ensure that each department does not exceed the above file limits?

A. Within the Site Area object, David can specify the Max files size for a resource attachment for all file resources saved within that site area

B. Within the Administration section of the WCM Libraries, under Resources, David can define the Max file size that each group is allowed to upload within an Authoring Template

C. Within the WCMSERVICECONFIG.PROPERTIES file David could write two rules, one allowing the Marketing Group to upload files up to 5MB another rule specifying the Legal Group could only upload files up to 2mb

D. The field Ruling, within the Legal Attachment Authoring template, should have a maximum file size of 2MB. The field Flash within the Marketing Content Authoring Template, should have a maximum file size of 5MB.

Answer: D

7. Wesley is a Workplace Web Content Management developer, and Lauren is a content creator. Lauren will be entering products into the Workplace Web Content Management Web site. One requirement for the site is that each product content item can (optionally) have a product picture. What can Wesley and Lauren do to facilitate this requirement?

A. Lauren adds an image field to each content item and uploads the appropriate product image to each content item. Wesley references the Image Component in the presentation template.

B. Lauren creates an Image Component in the Component Library for each product image. Wesley references the Library Components in the Presentation Template.

C. Wesley adds an Image Component to the Products Site Area. Lauren adds each product image to the Site Area as new content items are created. Wesley references the Site Area images in the Presentation Template.

D. Wesley adds an Image element to the Authoring Template. Lauren adds an image to each content item using the Image element. Wesley references the Image element in the Presentation Template.

Answer: D

8. Sidney is a developer building an intranet site with Workplace Web Content Management. The site is going to be displayed within WebSphere Portal.

Part of the site will include links to many HR forms and documents that already exist in the Portal Document Manager repository. If Sidney wishes to reuse these forms and documents within Workplace Web Content Management how can he do this?

A. Create a Document component for each item you wish to reference from within the Portal Document Manager.

B. Create a Document Manager component that references one of the Libraries within the Portal Document

Manager.

C. Create a Document Manager component for each item you wish to reference from within the Portal Document Manager.

D. Create a Component Reference component and make a reference to the Portal Document Manager repository.

Answer: C

9. AT Corp's Web site contains a number of Terms and Conditions statements. Each of these statements contains the date through which the statements are valid. Sam, a developer, does not want to hard code this value in each of the Terms and Conditions statements. What can Sam do to centralize the management of this date?

A. Use the <date> tag within each Terms and Conditions component.

B. Use the <calendar> tag within each Terms and Conditions component.

C. Create a Calendar component. Reference this component in each Terms and Conditions statement.

D. Create a Date and Time component. Reference this component in each Terms and Conditions statement.

Answer: D

10. Which one of the following tags will place a text link in a Navigator using the Display Title of the content item

A. <placeholder tag="titlelink"/>

B. <placeholder link="titlelink"/>

C. <placeholder tag="displaytitle"/>

D. <placeholder link="displaytitle"/>

Answer: A
